## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 22, 2005 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Punako (US Patent 3,792,417).

With regards to claims 1, and 3, Punako discloses a strain relief clamp 20 for use with a connector that is mounted on an end of a cable (abstract), the strain relief clamp including a transparent portion in the form of rectangular windows (45, 46). Applicant should note that the recitation of the intended use has not been given any patentable weight. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to

Art Unit: 3726

patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963). Marking of interest can be visible through the transparent portion of Punako's strain relief clamp.

For claim 2, Applicant should note that antikink protective sleeves are conventional with strain relief clamps.

For claim 18, see figure 1.

#### ***Allowable Subject Matter***

4. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 7-17 and 19 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: Applicant arguments filed September 22, 2005 with respect to claims 4-17 are persuasive (see pages 4-8 of the section titled "Remarks" in Applicant's response), therefore the USC 103 rejections of claims 4-17 are hereby withdrawn.

***Response to Arguments***

7. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
